

PROJECT FLOWCHAR

Launching Event

The idea behind FlowChar is to combine two processes:

Renewable heat and power generation from the syngas through **biomass gasification**

Clean water production using **flow-electrode capacitive deionisation (FCDI)** of brackish or sea water

Where?

 MS Teams Platform

When?

9th November 2021 at 10 A.M.

Agenda

All about the SGS Program and the Project Promoter

10:00 - 10:10 Welcome & Introduction

10:10 - 10:25 Department of Thermal

Technology @  Silesian University of Technology

All About the Project

10:25 - 10:50 The FlowChar Project

All About the Project Promotion

10:50 - 10:55 Follow us on

10:55 - 11:10 Nordic Biochar Network

All About You

11:10 - 11:30 Open Discussion

- ✓ Have we picked your interest?
- ✓ Or raised some concerns?
- ✓ Let's talk about it!
